Dear Mr. Lake:

I am writing to voice my objection to U.S. participation in any agreement that would withhold information from the consumer about the food we eat and the manner in which it is produced.

I am writing specifically about the use of genetic engineering as an experimental technology to produce that food. I insist upon the consumer's right to know. ALL genetically engineered food should be labelled as such including milk produced by bovine growth hormone technology. The American consumer should be given the choice of selecting such foods and not have the decision made for us behind closed doors.

Very truly yours,

GILDA BRODSKY
